EDUCATION

National Institute of Technology Warangal (NITW)

CGPA: 9.17/10

Bachelor of Technology in Computer Science and Engineering

Nov 2022 – May 2026

Coursework: DSA, OOPS, DBMS, CN, OS, ML

Indian Institute of Technology, Madras (IITM)

CGPA: 9.36/10

Bachelor of Science (BS) Online degree in Data Science

May 2023 – Dec 2026

Coursework: DSA in Python, OOPS, JAVA, DBMS, System Commands

EXPERIENCE

BNY (The Bank of New York)

Pune

Software Engineering Intern

May 2025 - July 2025

- Built a full-stack stock trading prototype with Angular, Spring Boot, and H2, featuring real-time functionality and smooth frontend-backend integration
- Developed two AI-driven automation pipelines for data extraction using generative AI, prompt engineering, and ETL for intelligent document processing.
- **Tools & Technologies:** Angular, Spring Boot, H2, Gen-AI, Prompt Engineering, ETL, Markdown Templates

PROJECTS

LMS(Library Management System) | *Vue.js, Flask, Celery, Redis, Git, SQLite3* Jan 2024 - May 2024

- A multi-user web application enabling users to seamlessly request and access e-books online.
- Built a Library Management System with JWT auth, Redis caching, and vue-Pdf integration for secure e-book access and downloads post-payment
- Implemented admin features for librarians with CRUD, request handling, analytics, Celery email alerts, and automated PDF reports sent via webhook alerts.

BDM(Business Data Management) | *Python, Pandas, OpenAI, RAG, UV*

Oct 2024 - April 2025

- LLM-Powered Business Intelligence for Inventory Optimization
- Conducted EDA on real-world business data to address stock-turnover disparity, followed by LLM-driven analysis via OpenAI APIs, covering ABC classification, ARIMA forecasting, BEP, profitability, and sensitivity assessments
- Used RAG pipelines to extract insights from CSVs and customer feedback, integrated image processing modules, and leveraged uv for fast, isolated Python execution, isolated execution of Python modules.

Other Projects | *Python, Vue.js, Flask, Qiskit, Selenium*

April 2024 - July 2025

- **Quantum Cipher Wars** : Built a BB84-based key exchange and hybrid post-quantum encryption model using Qiskit, comparing quantum and classical cryptographic methods.
- **BLOB** : Created a full-stack blogging web app with complete CRUD operations for users and posts, with authentication, responsive UI, and efficient data management.
- **AstralIDE** : Built a single-page code editor supporting 25+ languages with real-time code execution, user authentication, and state management via Vuex and a Flask backend.
- **Automated Python Bots** : Built Selenium-based bots for tasks like auto-applying to LinkedIn jobs, leveraging web scraping with BeautifulSoup
- **ML Accuracy Optimization** : Participated in a Kaggle challenge to boost model accuracy using train/test data, via data preprocessing, feature engineering, and insightful reporting.

TECHNICAL SKILLS AND INTERESTS

Languages: C++, Java, JavaScript, HTML, CSS, Python, TypeScript

Frameworks & Tools: Flask, VueJS, AngularJS, SpringBoot, Angular Material, Hadoop, Zookeeper

Developer Tools: Git, Postman, Swagger UI, VS Code, PyCharm, IntelliJ, Bash, Unix/Linux Systems

Cloud/Databases: SQL, SQLite3, PostgreSQL, H2

Soft Skills: Good Communication Skills, Good Presentation Skills, Team Coordination Skills

ACHIEVEMENTS

Coding Experience: Solved Around 750+ Questions in LeetCode and Gfg

AIR 1733 in Jee Main : Secured AIR 1733 among 10 Lakh Students

Merit List in Btech : Ranked among the top 10 high scorers (CSE) every year

Achieved 10 CGPA : Secured 10 CGPA in Foundation level in IITM Online Degree

IITM Certifications : Completed 2 Diplomas and Foundation in IITM
